Date:
Patient Name:
Date of Birth:

Doctor: In the process of testing for hearing loss, the above patient was found to exhibit the following:

Asymmetrical hearing loss

History of active drainage from the ear within the previous 90 days

History of sudden or rapidly progressive hearing loss within the previous 90 days

Acute or chronic dizziness

Unilateral hearing loss of sudden or recent onset within the previous 90 days

Visible evidence of cerumen accumulation or a foreign body in the ear canal

Audiometric air-bone gap equal to or greater than 15 dB (ANSI) at two consecutive frequencies

As a result, we have referred him/her to you for examination and possible treatment. Please notify our office of the results of the examination.

Sincerely,

Pinky P Khatri, Au.D., CCC-A
